

CAMS2021

Advancing Materials and Manufacturing

NEW CONFERENCE
DATE ANNOUNCED

The 7th conference of the Combined Australian Materials Societies; incorporating Materials Australia and the Australian Ceramic Society.

1st - 3rd June 2022 | The University of Melbourne

BOOK NOW

www.cams2021.com.au

Join Australia's largest interdisciplinary technical meeting on the latest advances in materials science, engineering and technology.

Our technical program will cover a range of themes, identified by researchers and industry, as issues of topical interest.

CONFERENCE CO-CHAIRS

Prof Xinhua Wu
Monash University
xinhua.wu@monash.edu

Dr Andrew Ang
Swinburne University
aang@swin.edu.au

Prof Aijun Huang
Monash University
Aijun.Huang@monash.edu

Conference Secretariat:

Tanya Smith tanya@materialsaustralia.com.au T+61 3 9326 7266

Symposia Themes

- Additive, advanced & future manufacturing, processes and products
- Advances in materials characterisation
- Advances in steel & light metals technology, metal casting & thermomechanical processing
- Biomaterials & nanomaterials for medicine
- Ceramics, glass and refractories, including materials for nuclear waste forms & fuels
- Corrosion & wear resistant materials for demanding environments
- Materials for energy generation, conversion and storage
- Materials simulation & modelling
- Nanostructured/nanoscale materials and interfaces
- Progress in cements, geopolymers and innovative building materials for civil infrastructures
- Surfaces thin films & coatings
- Translational research in polymers and composites
- Use of waste materials and environmental remediation/recycling and energy efficiency
